

Ramon Christus Tomaquin

09925937460 | arcee.tomaquin@gmail.com | Taguig, Metro Manila

Skills

Git, Github, Gitlab, Kokoro, Gerrit, Buganizer, Eclipse, VSCode, Java, TypeScript, Appium, Selenium, Playwright, Airtable, Perfecto, Digital AI, Sauce Labs, WebDriverIO, IntelliJ IDEA, Android Testing, iOS Testing, Web Testing, Gradle, Maven, JavaScript, Python, Linux, Odoo, Test Sponge, Allure

Experience

Personal Project | Makati City, Metro Manila

Software Development Engineer in Test | 10/2025 - Present

- **AI-Powered Playwright Automation Framework with Allure Report:** An intelligent, end-to-end test automation framework built using Playwright and integrated with Allure Reporting for detailed test visualization. The framework leverages the OpenAI API to enhance test creation, analysis, and maintenance through AI-driven automation. It is fully integrated into a GitHub Actions CI/CD pipeline, enabling automated test execution on every commit or pull request. After each run, Allure reports are automatically generated and deployed to GitHub Pages, serving as a live Allure server for easy access to real-time and historical test results. This solution provides a scalable, maintainable, and intelligent approach to modern test automation with continuous integration and transparent reporting.

Cognizant (Google) | BGC, Metro Manila

Automation Developer | 08/2025 - Present

- Developed and maintained AI-powered automation test scripts using Java and Appium, ensuring the quality and reliability of the Client's application through comprehensive test suites.
- Integrated automated tests with our Fusion and Kokoro CI/CD pipelines, enabling continuous testing and providing rapid feedback to the development team.
- Utilized advanced AI-based automation with Gemini for image recognition to accurately validate map images and other visual elements, improving test accuracy and coverage.
- Leveraged Digital.ai as a device farm to execute tests across a wide range of devices and platforms, ensuring broad compatibility and performance.
- Translated complex manual test cases into scalable, reusable automation scripts, significantly increasing test coverage and reducing manual testing efforts for critical features.

Accenture (Xcel Energy) | Mandaluyong, Metro Manila

Sr. Automation Engineer | 09/2024 - 08/2025

- Developed and maintained automated tests for API and mobile UI using Agile Scrum methods to ensure consistent product quality throughout iterative development cycles.
- Used the Karate framework for API validation and TypeScript for cross-platform mobile UI automation across iOS and Android, reducing manual testing efforts and increasing reliability.
- Integrated test scripts into GitLab CI/CD pipelines, supporting continuous testing and fast feedback in line with Agile DevOps practices.
- Translated detailed manual test cases into scalable, reusable automation scripts, improving efficiency and test coverage for critical mobile workflows.
- Documented and reported defects using JIRA with clear root cause details, helping streamline issue resolution and improve team communication.

WeSupport, Inc. (TechMahindra Ltd.) | Makati, Metro Manila

Automation Tester | 05/2023 - 08/2024

- **Test Strategy and Planning:** Spearheaded the creation and execution of comprehensive test plans and schedules, ensuring alignment with project timelines and quality standards. Collaborated with cross-functional teams to define test objectives and deliverables.
- **Manual and Automated Testing:** Conducted both manual and automated testing to validate software functionality and performance. Developed and maintained automated test scripts using Selenium, Appium, and Perfecto, significantly reducing testing time and improving accuracy.
- **Debugging and Script Maintenance:** Proactively identified and resolved test failures, collaborating with developers to troubleshoot and refine scripts. Updated and optimized test scripts based on evolving requirements, enhancing their robustness and efficiency.

- Performance and Scalability Testing: Led efforts to enhance application scalability and performance through rigorous testing. Implemented and executed load and stress tests, providing valuable insights to optimize system performance under various conditions.

WeSupport, Inc. | Makati, Metro Manila

Junior Odoo Programmer | 10/2022 - 05/2023

- Backend System Development: Designed and developed robust backend systems and APIs using Python, ensuring efficient data processing and seamless integration with frontend applications. Implemented RESTful APIs to facilitate smooth communication between the server and client-side applications.
- Frontend Development: Created and maintained frontend elements using XML, ensuring that the user interface was intuitive and visually appealing. Integrated these elements with backend systems to deliver a cohesive and responsive user experience.
- System Monitoring and Maintenance: Oversaw daily system operations, proactively monitoring performance to ensure that system functionality aligned with team goals and organizational requirements. Implemented automated monitoring tools to track system health and performance metrics.
- Server Management: Managed server updates, including applying patches and upgrades to enhance security and functionality. Conducted regular performance assessments and optimized server configurations to ensure reliable and efficient operation. Implemented comprehensive backup and recovery strategies to safeguard data and minimize potential disruptions.
- Client Liaison: Acted as the primary point of contact for clients, effectively coordinating communication and managing resources to address client needs and project requirements. Facilitated regular updates and provided technical support to ensure client satisfaction and project success.

WeSupport, Inc. | Makati, Metro Manila

Odoo Developer Trainee | 07/2022 - 10/2022

Education

Technological Institute of the Philippines | Quezon City, Metro Manila

Bachelors of Science in Information Systems | 06/2022

- Deans Lister (2018-2019)
- Department Student Council - Vice President (2018 - 2019)
- Junior Information Systems Security Association - President (2018 - 2020)
- Supreme Student Council - Information Systems Representative (2020-2021)
- Vice-President Lister (2020-2021)
- Published Book: Predicting Cyber-Trafficking Websites Using a Naive Bayes Algorithm, Logistic Regression, KNN, and SVM
